Geography – Where do we go to school – Autumn 1 Term 2024

Key Vocabulary

Weather	The weather of a place is the day to day condition of the atmosphere, e.g. sunny, snowing, warm, etc
Temperature	Temperature is the degree of hotness or coldness of a place.
Weather Vane	A weather vane is a tool for showing from which direction the wind is blowing.
Season	The seasons are four times of year that have different weather and they are spring, summer, autumn and winter.
Thermometer	A thermometer is an instrument which is used to measure temperature.
Reading	When you take a reading you record the measurement shown on the instrument.
Fair test	A fair test is an investigation where only one thing is different each time. For example, by measuring at the same place and time so only the day is different.
Axis	An axis is an imaginary straight line through Earth which rotates around it.
Orbit	An orbit is the regular route in space that one object takes around another, for example, the path Earth takes around the Sun.
Cycle	A cycle is something that happens from start to finish, usually before it starts again and repeats.
The Sun	The Sun is a star around which Earth orbits. It is the source of light and heat for our planet.
Spring	Spring is the season between winter and summer. In the UK, we experience spring in the months of March, April and May.
Summer	Summer is the season between spring and autumn. In the UK, we experience summer in June, July and August.
Autumn	Autumn is the season between summer and winter. In the UK, we experience autumn in September, October and November.
Winter	Winter is the season between autumn and spring. In the UK, we experience winter in December, January and February.
Daylight	Daylight is the time when the natural light from the Sun lights the sky.
